Periodontal Treatment Mock Board Calculus Detection (Maxillary)

Teeth assignments are recorded on Periodontal Treatment Mock Board forms and on the **Candidate Worksheet**. Refer to the [Candidate Manual](#) for **Performance Expectations** and **Scoring Rubric**.

Record **Y = YES**, Calculus is **present**.
 Record **N = NO**, Calculus is **NOT present**.

Periodontal Treatment Mock Board

Calculus Removal and Complete Calculus Removal

Candidates are assigned one quadrant for calculus removal on the proprietary SimProDH™, exclusively available during the Periodontal Treatment portion of the ADEX Dental Examination and ADEX Dental Hygiene Examination.

Programs using the Acadental ModuPro DS™ or other simulated models may assign the Lower Right, Lower Left or Lower Arch to meet the recommended number of surfaces for evaluation.

- **Calculus Removal.** Identify (by highlighting) the 12 **key** calculus removal surfaces within the assignment (evaluated at 5.5 pts each for up to 66.0 pts total).
- **Complete Calculus Removal.** Any additional **non-key** surfaces within the assignment (up to 6 pts total).

Record **Y = YES**, Calculus has been **removed**.

Record **N = NO**, Calculus has not been **NOT** removed.
